ABOUT ME

I am a passionate and ambitious student of final year B.Tech, studying at Bonam Venkata Chalamayya Engineering college, Odalarevu. I have keen interest in computer science and I am dedicated in expanding my knowledge and skills in it.

CAREER OBJECTIVE

Seeking a challenging position in the field assigned, Exploring my skills and working hard as true to my conscience for developing the organization as well as for my personal growth

PROJECTS

1 .PERSONAL PORTFOLIO WEBSITE

Developed a responsive personal portfolio website using HTML, CSS, and JavaScript. The website showcases projects, skills, and contact details with an interactive and user-friendly design. Implemented smooth animations, a dynamic project gallery, and optimized performance for various devices.

2. Heart Disease Prediction (web app)

I've developed a project(web app) that predictsthe percentage of the population who Might get heart disease based on two independent values given by the user.The whole project Involves training the model with an appropriate algorithm,testing the accuracy of the model ,building and deploying the model.

INTERNSHIPS

Full Stack Development   -- IIDT & APSCHE
Enhanced Knowledge of python, Django,JS and web development frameworks,working on real-world projects and refining problem-solving skills

Web Technologies and SQL   -- HQL EduTech
A virtual Internship on Frontend technologies and SQL database provided by HQL EduTech.
